DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by CH Patent Document 1 (2191378). Claims 1 & 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over CH Patent Document 1 (2191378). Document 1 discloses and air conditioner system and comprising: and outdoor unit with a compressor, an outdoor heat exchanger, an indoor unit mounted on a ceiling with an indoor heat exchanger, a fan, an air supply duct, a ventilation duct and furthermore a preheat exchanger for indirect heat exchange of the external air and room air.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over CH Patent Document 1 (2191378) in view of CH Patent Document 2 (2532406). Document 1 discloses and air conditioner system as stated above but lacks a centrifugal fan.

Art Unit: 3744

However, Document 2 discloses a fan consisting of a centrifugal fan. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the disclosed invention of Document 1 with a centrifugal fan as teach in Document 2 for drawing air from under and discharging in a radial direction as fan rotates.

Allowable Subject Matter

Claims 3-21 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
